## Journey Mapping

Customer Journey Tracking

**Next**

# Overview

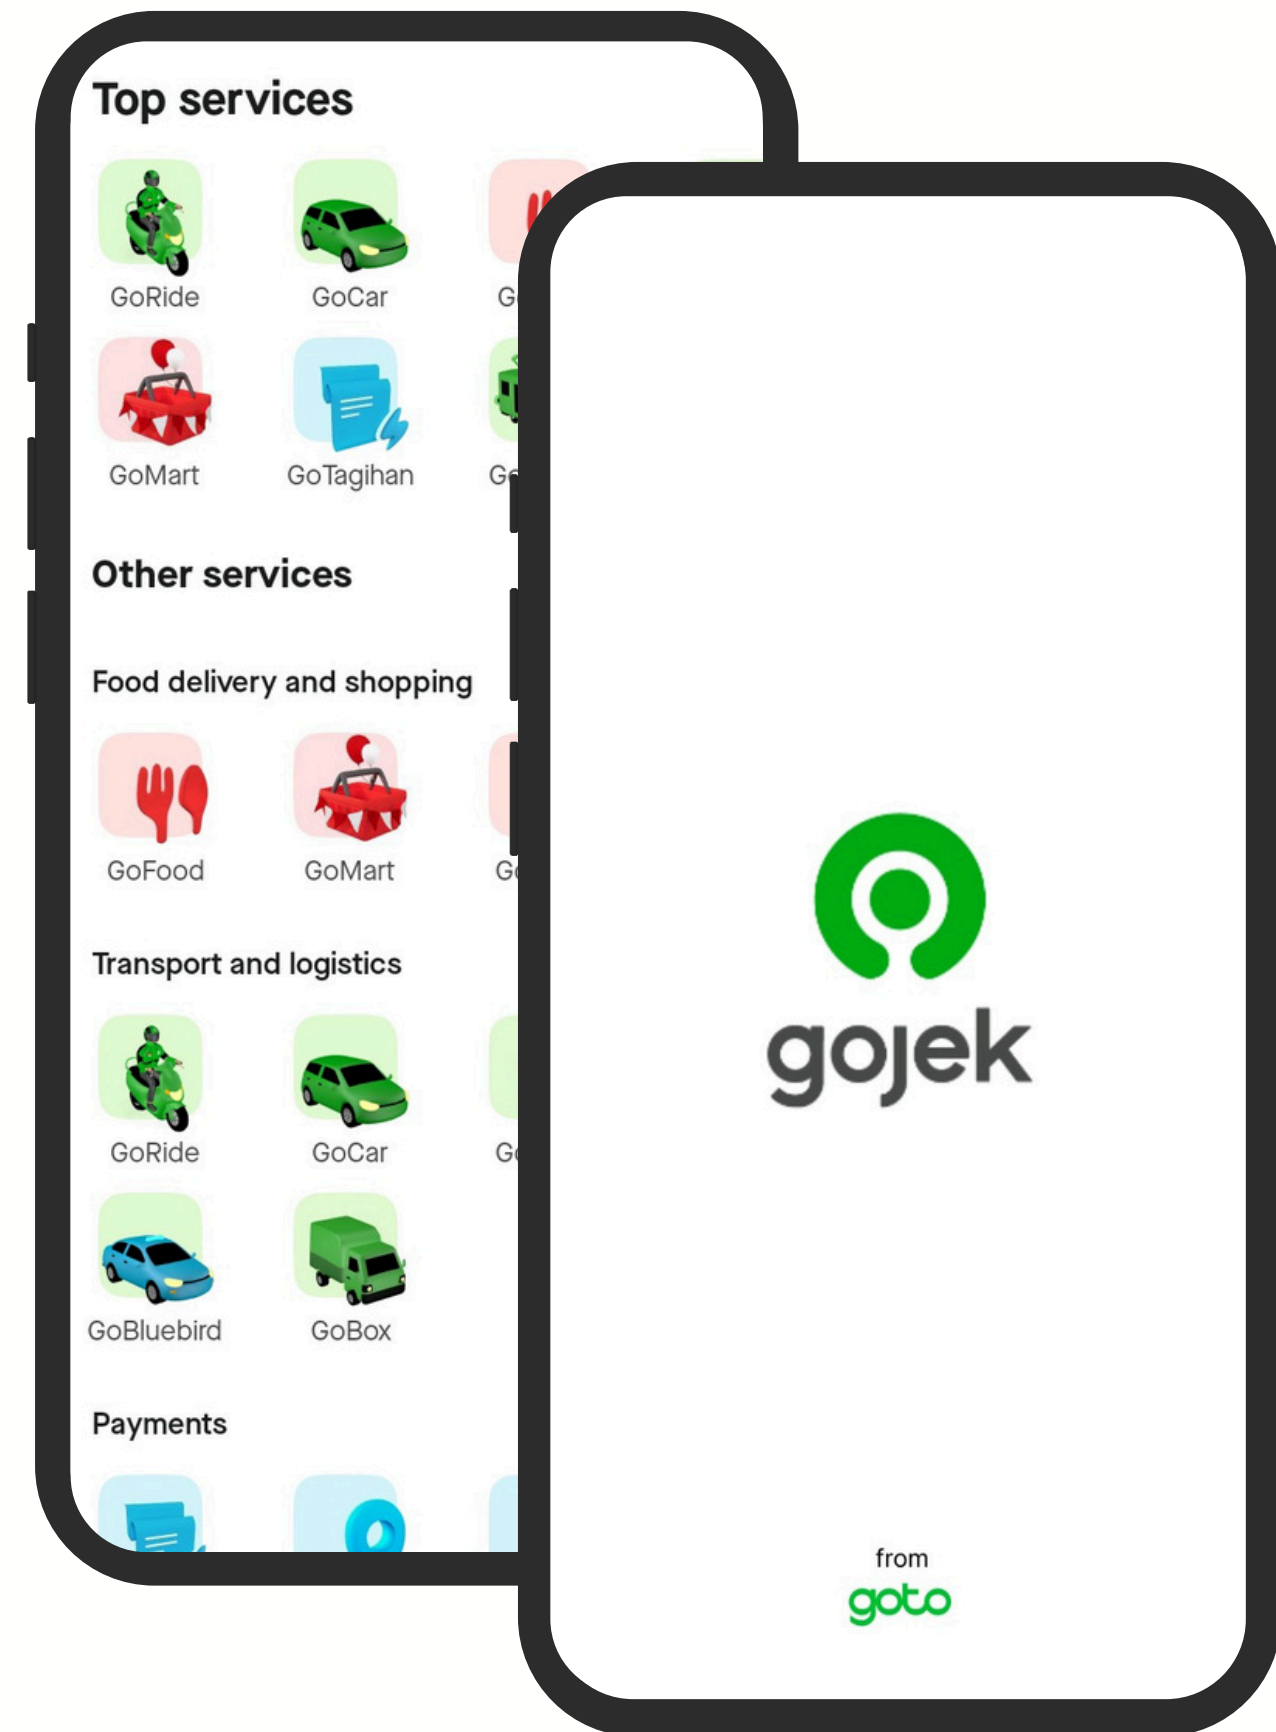

As a **Data Analyst in Gojek**. I need to work with product or business team and find the right metrics for experimentation.

My task is to:

- **Choose a specific customer journey.**
- Act as a customer and take screenshots on each steps.
- Define the **event name, metrics** to be tracked, **the data** to be collected, and provide **example values**.

# About Gojek

- The Gojek app is a multi-service platform that provides various on-demand services in Indonesia and some other Southeast Asian countries.
- The Gojek app provides users with access to different services such as **transportation, food delivery, courier services, shopping, ticket booking, and more.**

# WHO AM I?

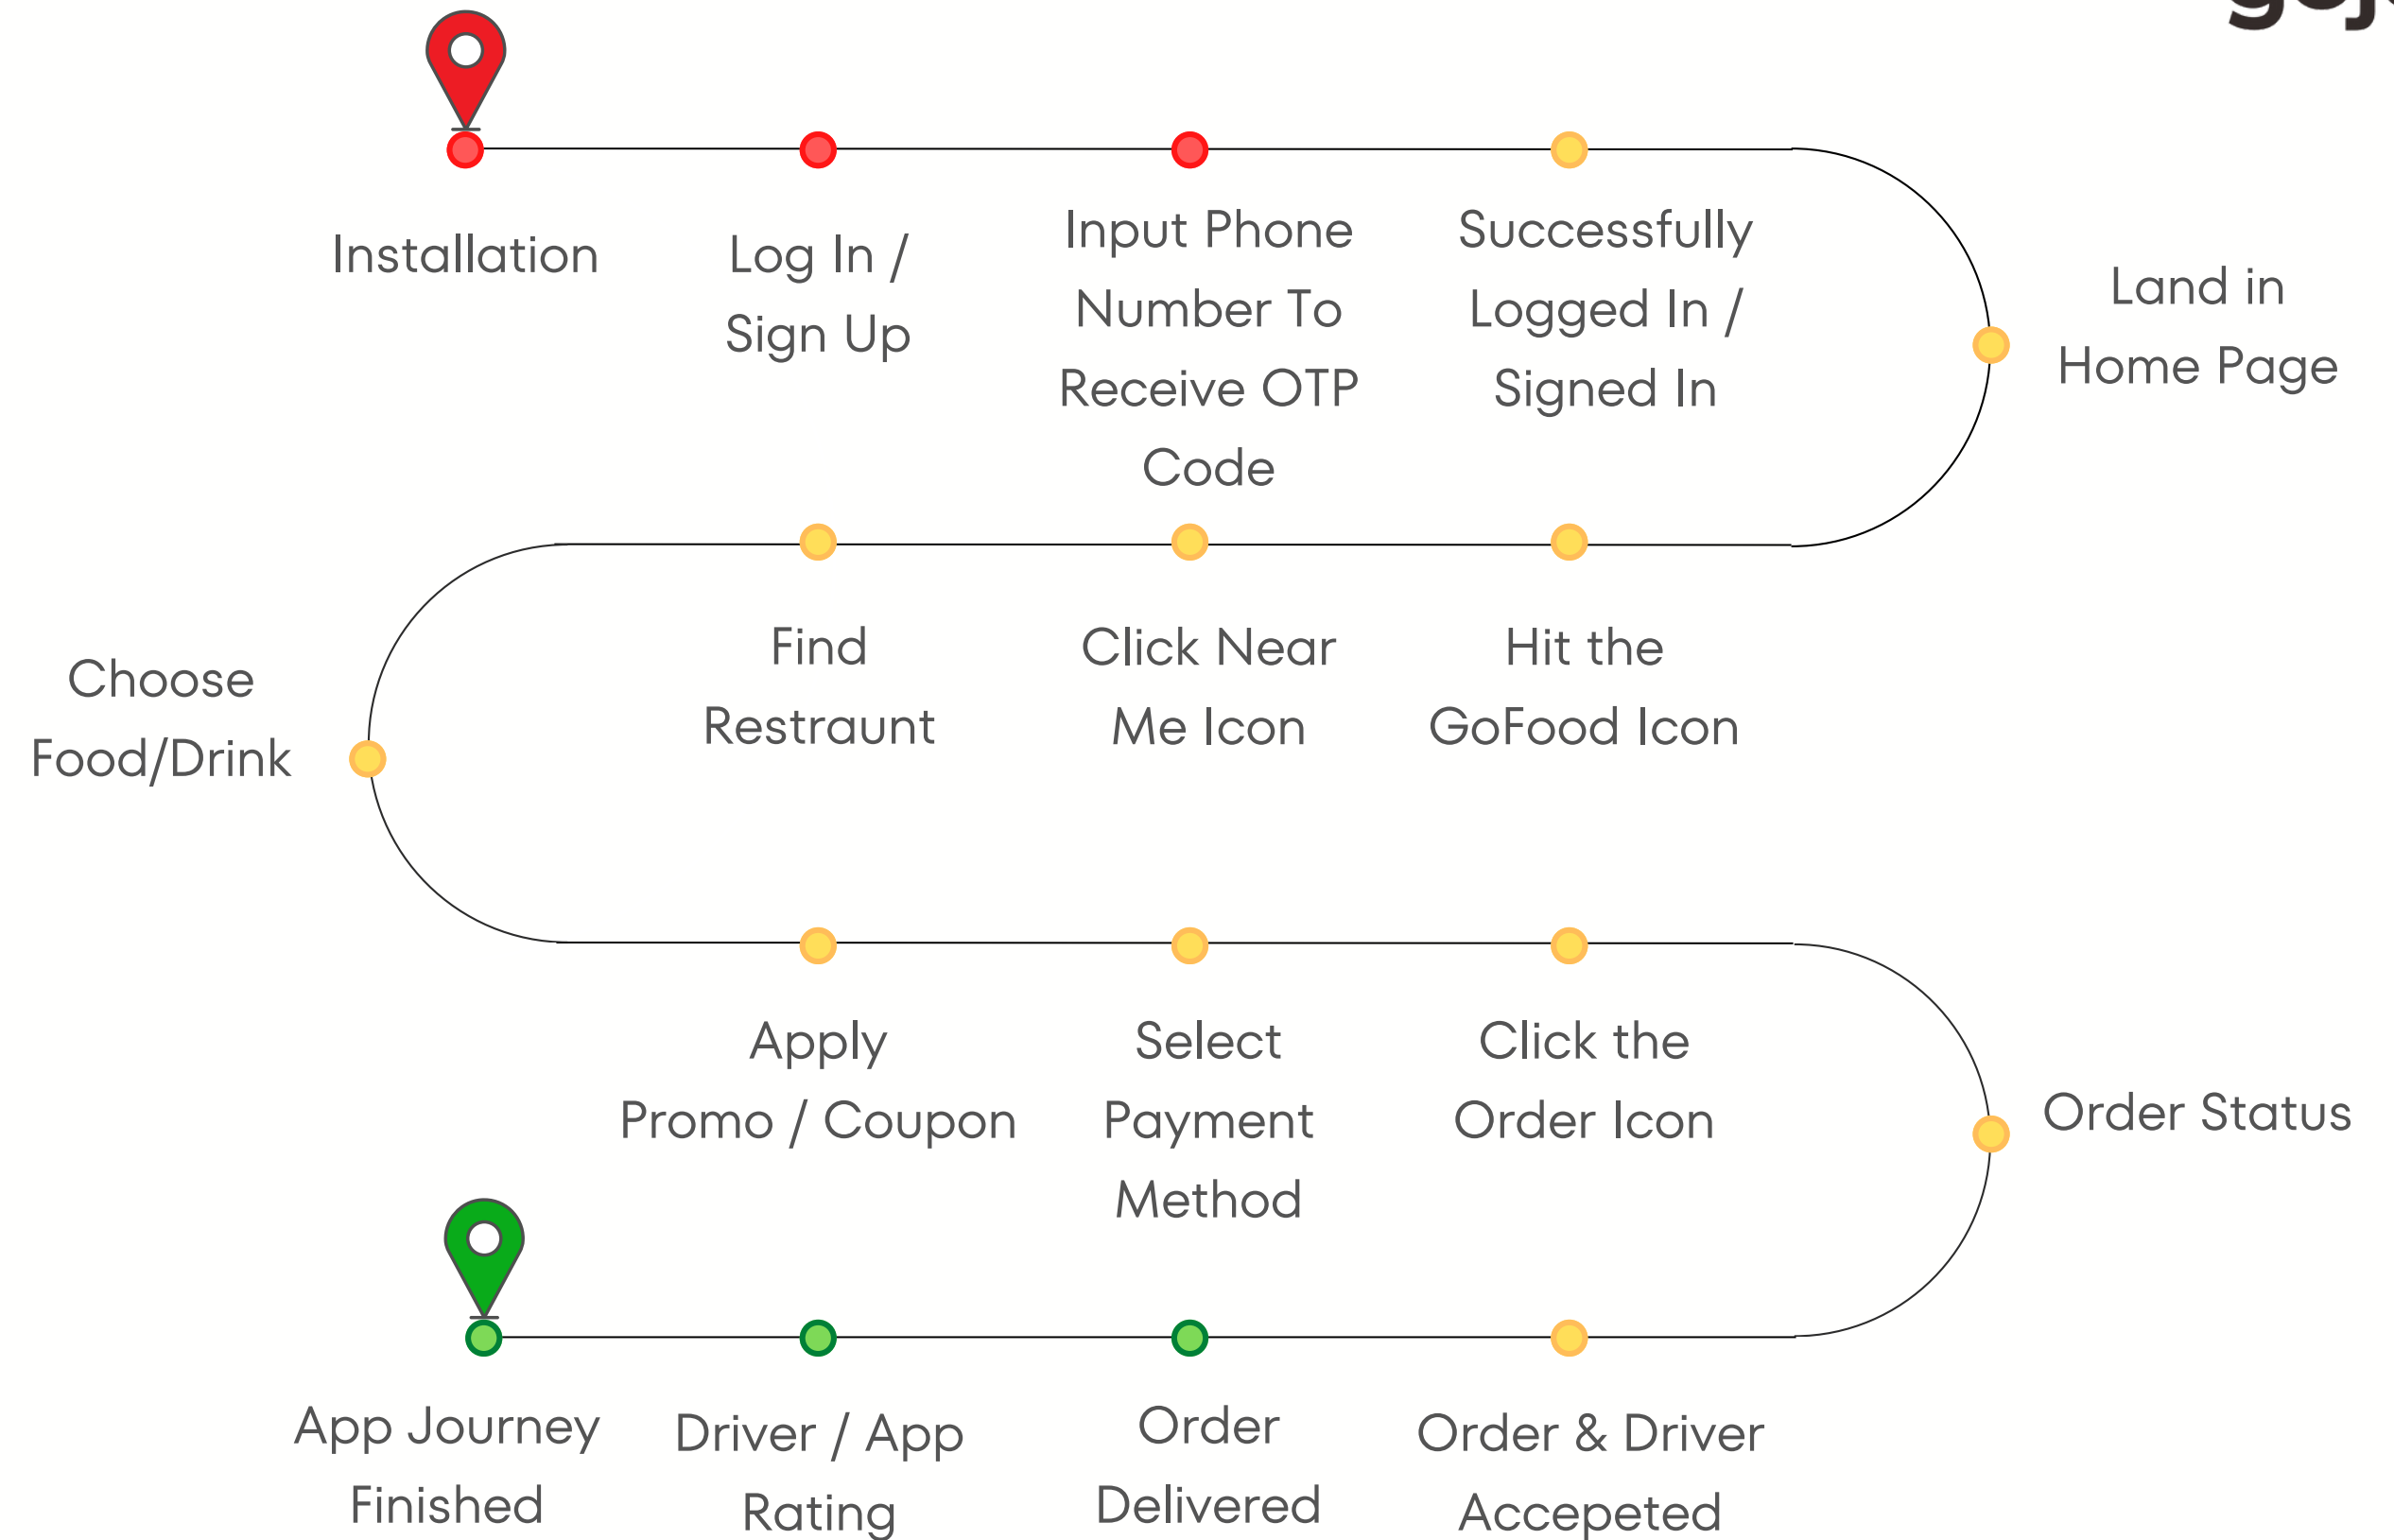

**Returning Customer**, Who is familiar with with Gojek Service and Application. Ordering food **2 times a week**.

# Log - In / Sign Up

## Metrics

- Daily Active Users (DAU)
- Retention Rate
- Authentication Success Rate
- Time to Authenticate

## Example Values

- 10,000 user
- 45%
- 90%
- 5 seconds
- Android / iOS

## ● Trigger When

User opens the app and initiates log in or sign up

## ● Event Name

Log In / Sign Up Initiated

## ● Data To Be Tracked

User ID ( if applicable )  
Timestamp  
Authentication Method  
Device Type

## ● Notes & Details

This is how we will know how many users installed app and launched in their device.

Next

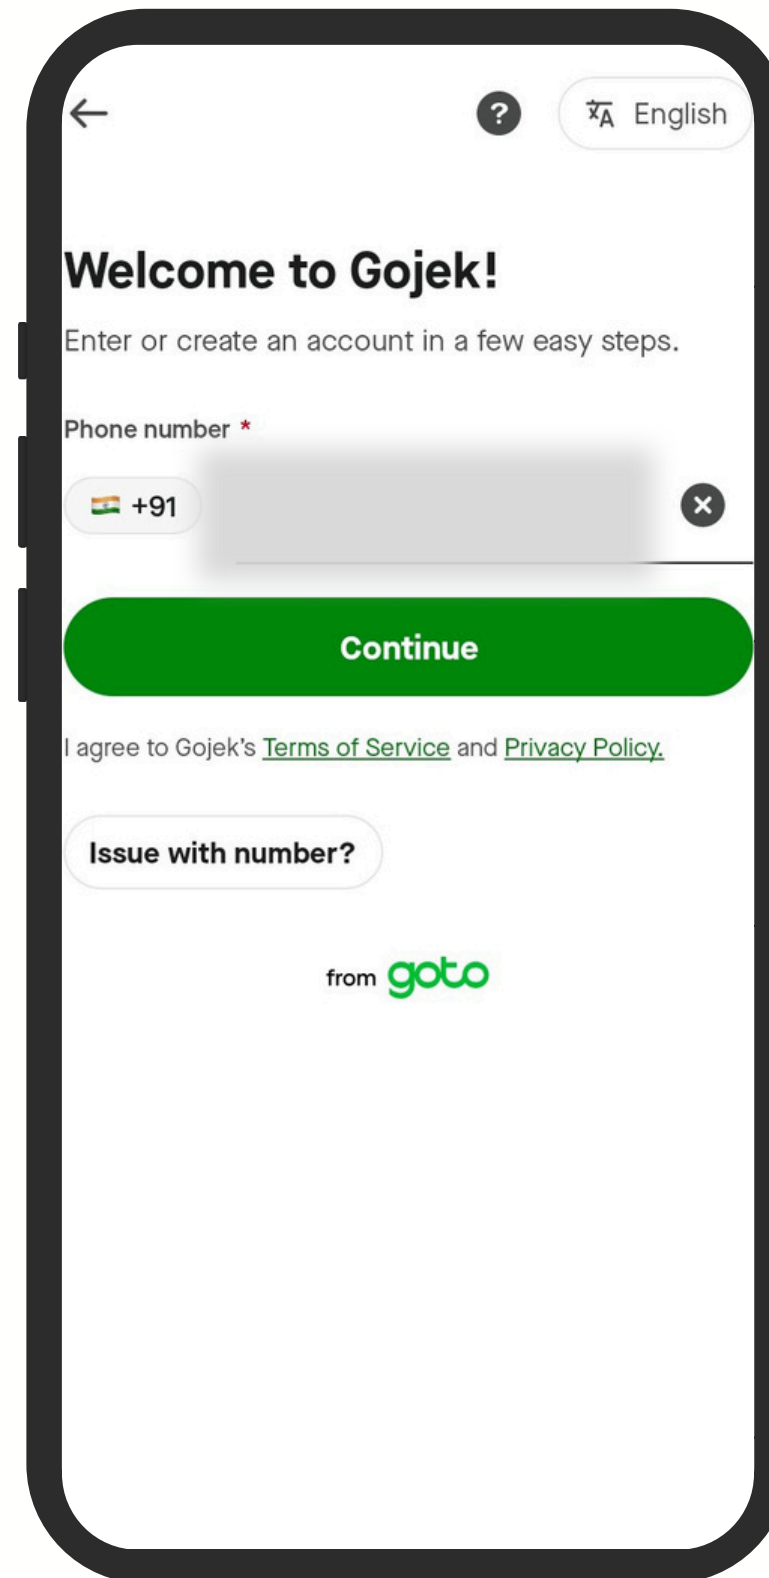

# Input Mobile Number

## Metrics

- Total Registration
- Abandonment Rate

## Example Values

- 1234
- +91
- 12345789

The screenshot shows the Gojek mobile app's registration screen. At the top, there's a back arrow, a help icon, and a language selector set to 'English'. The main heading is 'Welcome to Gojek!' followed by the instruction 'Enter or create an account in a few easy steps.' Below this is a 'Phone number' input field with a red asterisk. The field has a dropdown menu showing '+91' with the Indonesian flag, and a clear button (X). A green 'Continue' button is positioned below the input field. Underneath the button, there's a line of text: 'I agree to Gojek's [Terms of Service](#) and [Privacy Policy](#).' At the bottom, there's a link that says 'Issue with number?' and a 'from goto' logo.

## ● Trigger When

User inputs phone number to receive OTP

## ● Event Name

OTP Requested

## ● Data To Be Tracked

User ID  
Timestamp  
Country Code  
Phone Number

## ● Notes & Details

This is how we will understand geographic distribution of new user.

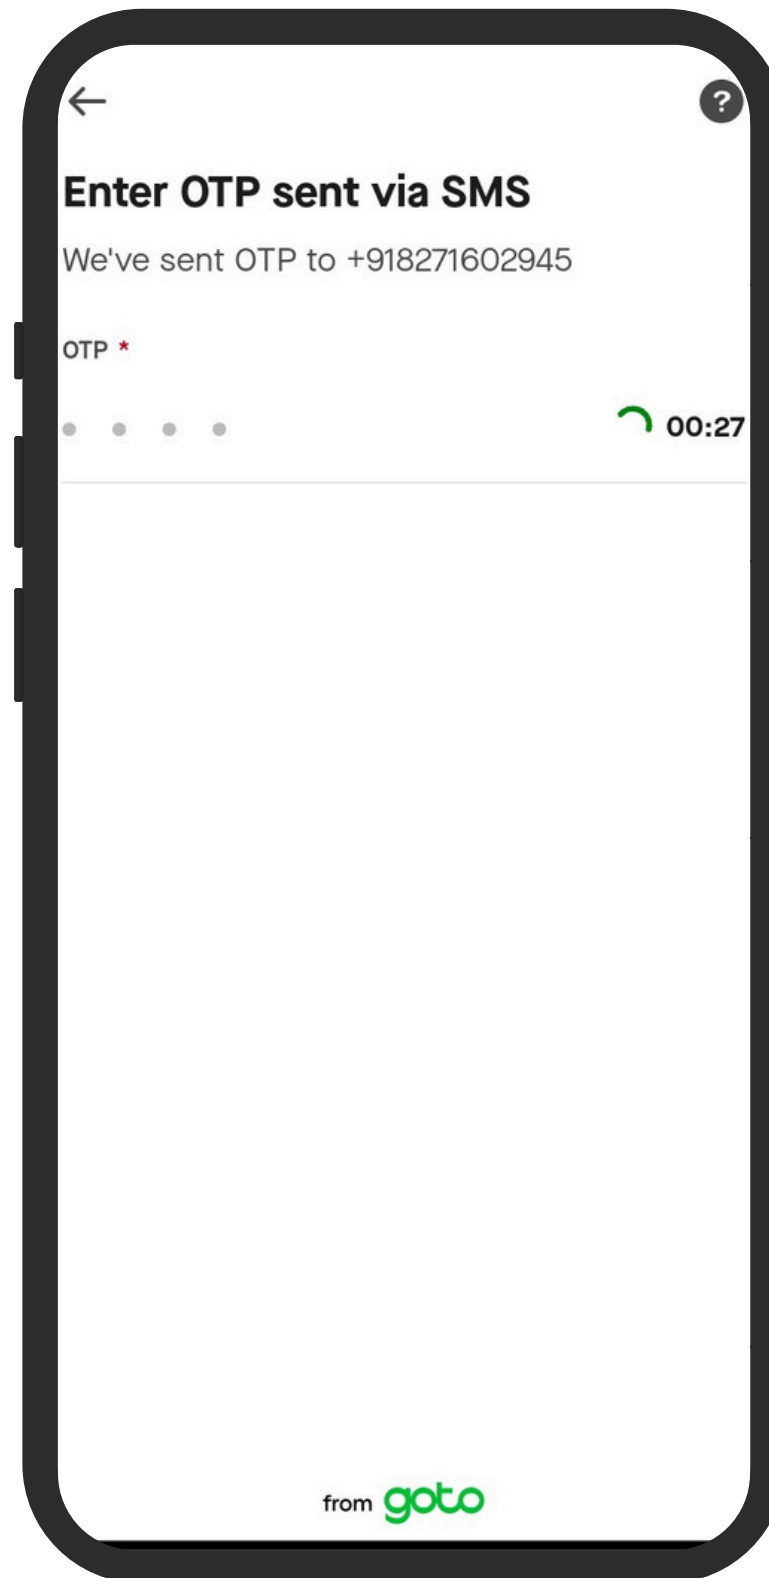

# OTP Verification

## Metrics

- OTP Delivery Success Rate
- Average OTP Verification Time

## Example Values

- Delivered
- Verified
- 30 seconds

## ● Trigger When

User inputs received OTP code

## ● Event Name

OTP Verification

## ● Data To Be Tracked

User ID  
Timestamp  
OTP sent/received  
Verification status

## ● Notes & Details

This is how we will assess the reliability and efficiency of the OTP system.

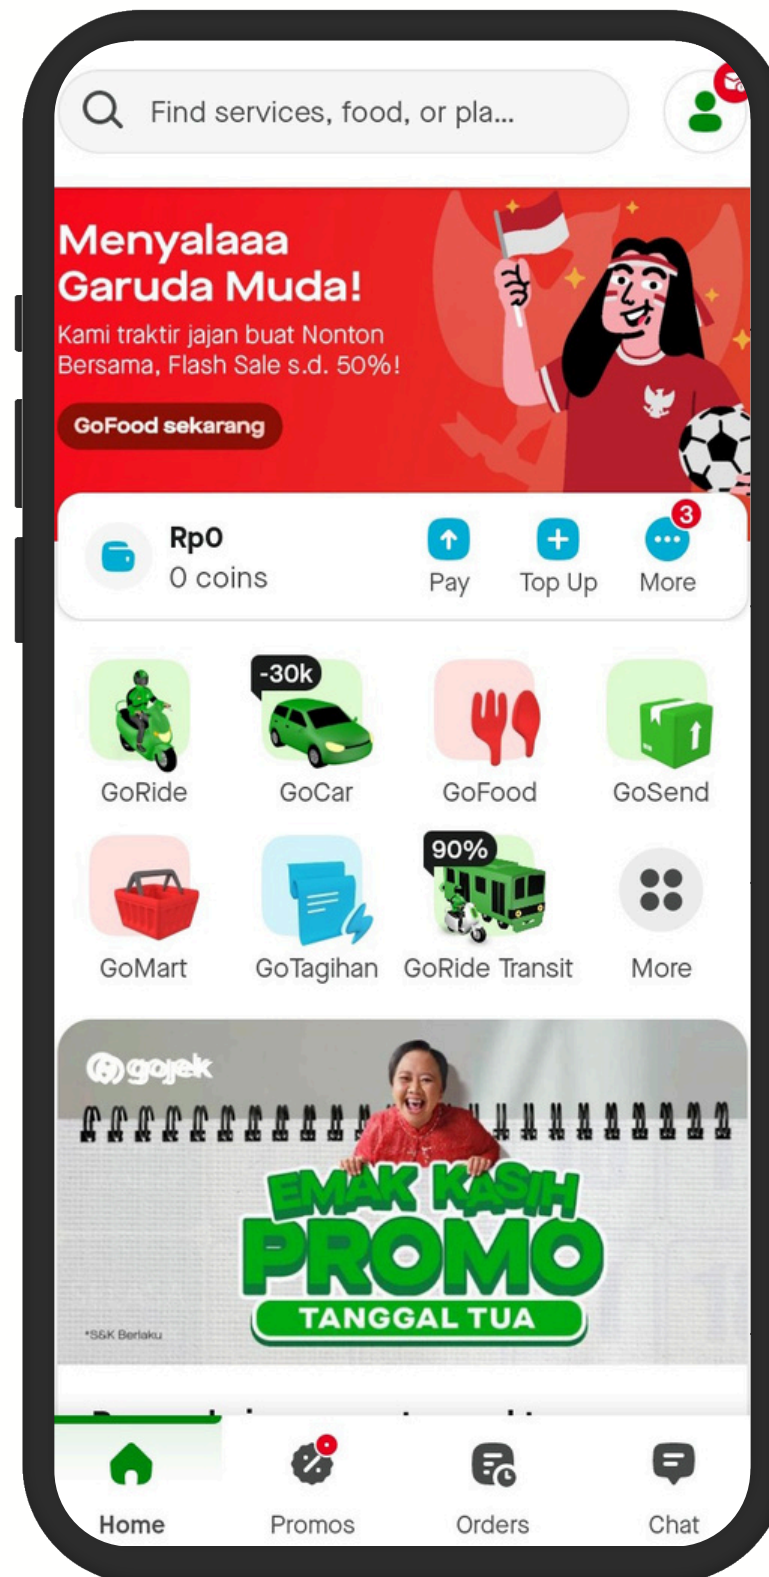

# Home Page

## Metrics

- Dwell Time on Home Page
- User Acquisition Type
- Average Session Duration
- Bounce Rate

## Example Values

- 3 minutes
- Organic Search
- 8 minutes
- 40%

## ● Trigger When

User successfully logs in/signs up

## ● Event Name

Home Page Viewed

## ● Data To Be Tracked

User ID

Timestamp

Session ID

## ● Notes & Details

This is how we will know the engagement and effectiveness of the home page.

Next

# GoFood Service

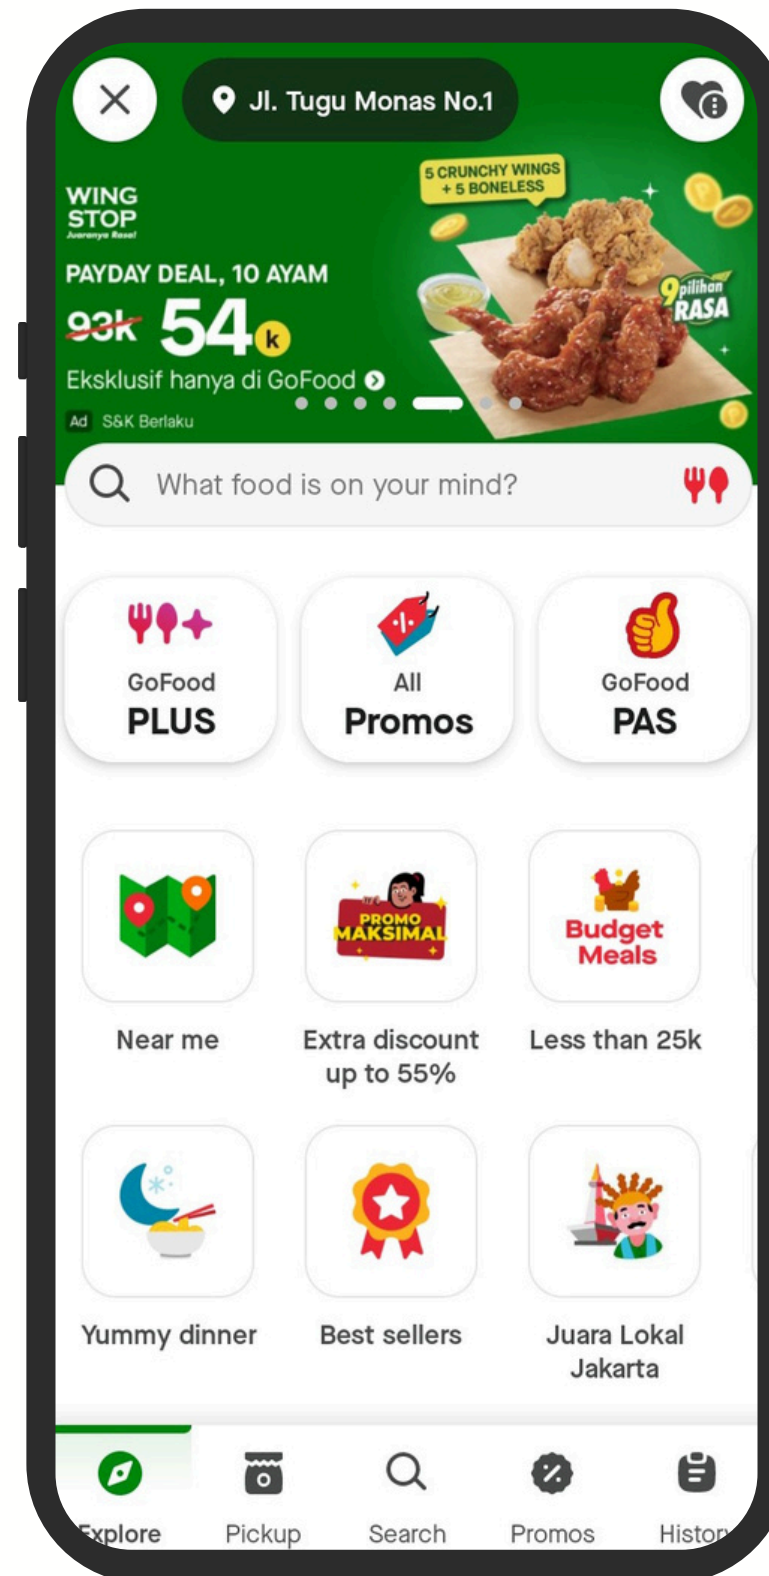

## Metrics

- GoFood Selection Rate
- Abandoned Rate

## Example Values

- 76%
- 20%

## ● Trigger When

User click on GoFood Icon

## ● Event Name

GoFood Service Selected

## ● Data To Be Tracked

User ID  
Timestamp  
Session ID

## ● Notes & Details

This is how we will measure the interest level in the GoFood service, which is crucial for understanding user intent and promoting this service.

Next

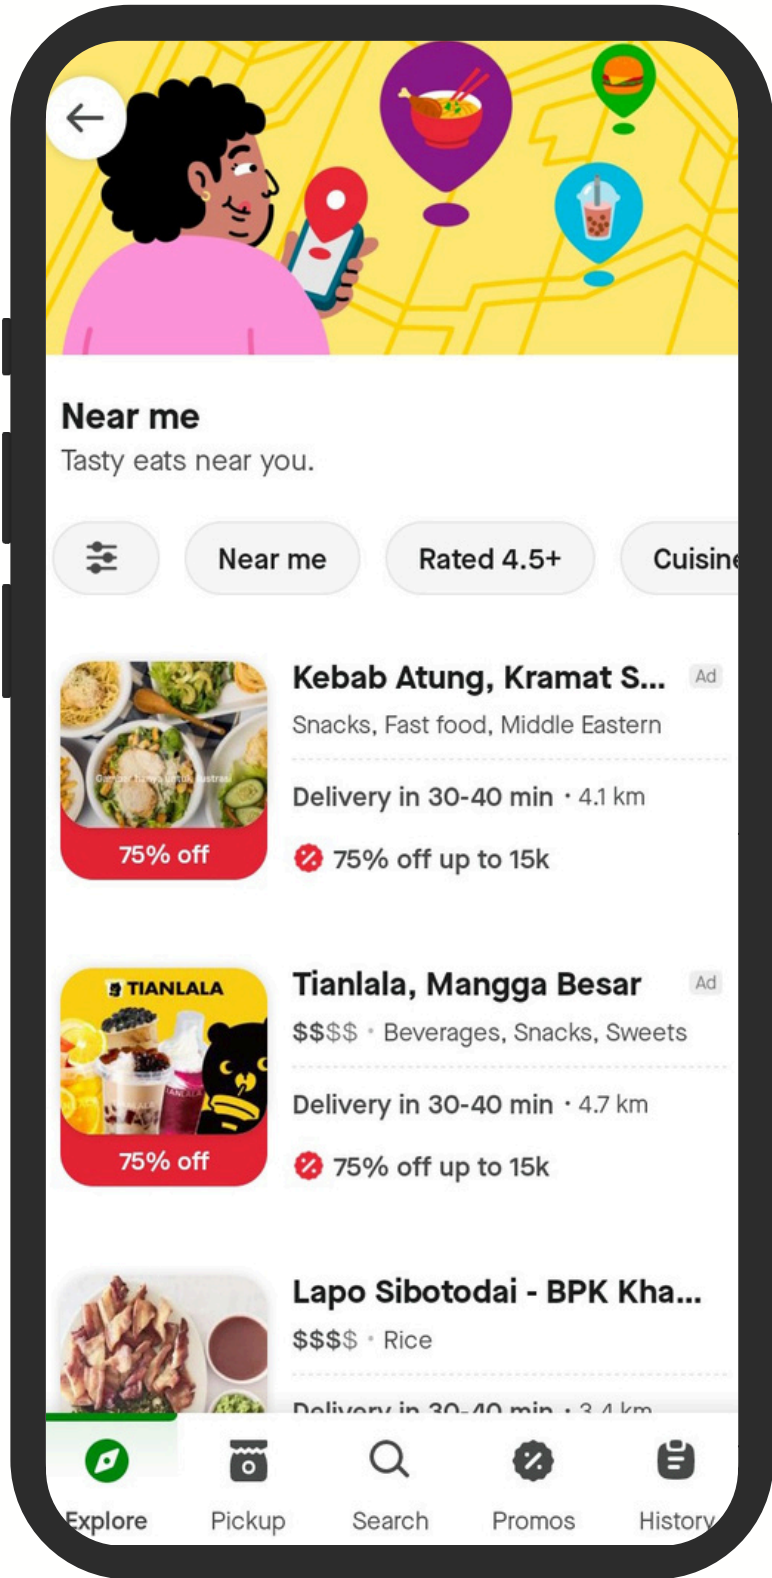

# Find Restaurant

## Metrics

- Cuisine Preference Rate
- Price Range Preference Rate
- Conversion Rate Post-Filter
- Abandonment Rate

## Example Values

- Beverages 20%, Fast Food 30%
- \$\$\$\$ Below Rp16.000
- 75%
- 20%

## ● Trigger When

User click on Near Me icon

## ● Event Name

Find Restaurant

## ● Data To Be Tracked

User ID

TimeStamp

Restaurant ID

Selected Cuisine Type

Selected Price Range

## ● Notes & Details

This is how we will know the effectiveness of our restaurant suggestion system and user preferences.

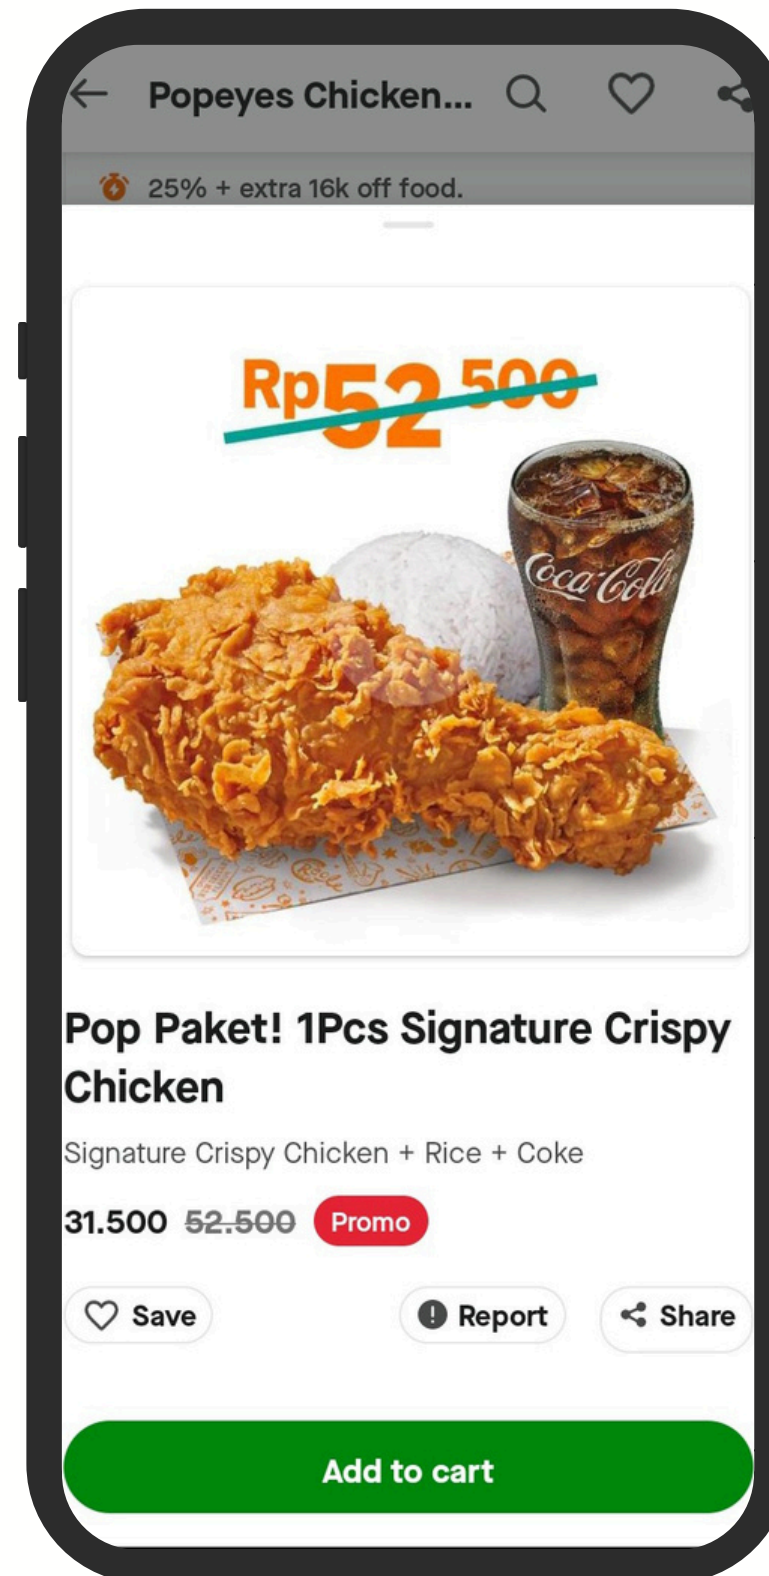

# Choose Food/Drink

## Metrics

- Popular Item
- Cart Size per Order
- Add to Cart Rate
- Abandonment Rate

## Example Values

- MYL01
- 3 items
- 60%
- 30%

## ● Trigger When

User choose restaurant item

## ● Event Name

Item Added to Cart

## ● Data To Be Tracked

User ID

TimeStamp

Item ID

Quantity

Price

## ● Notes & Details

This is how we will know how effectively users navigate the menu and make selections.

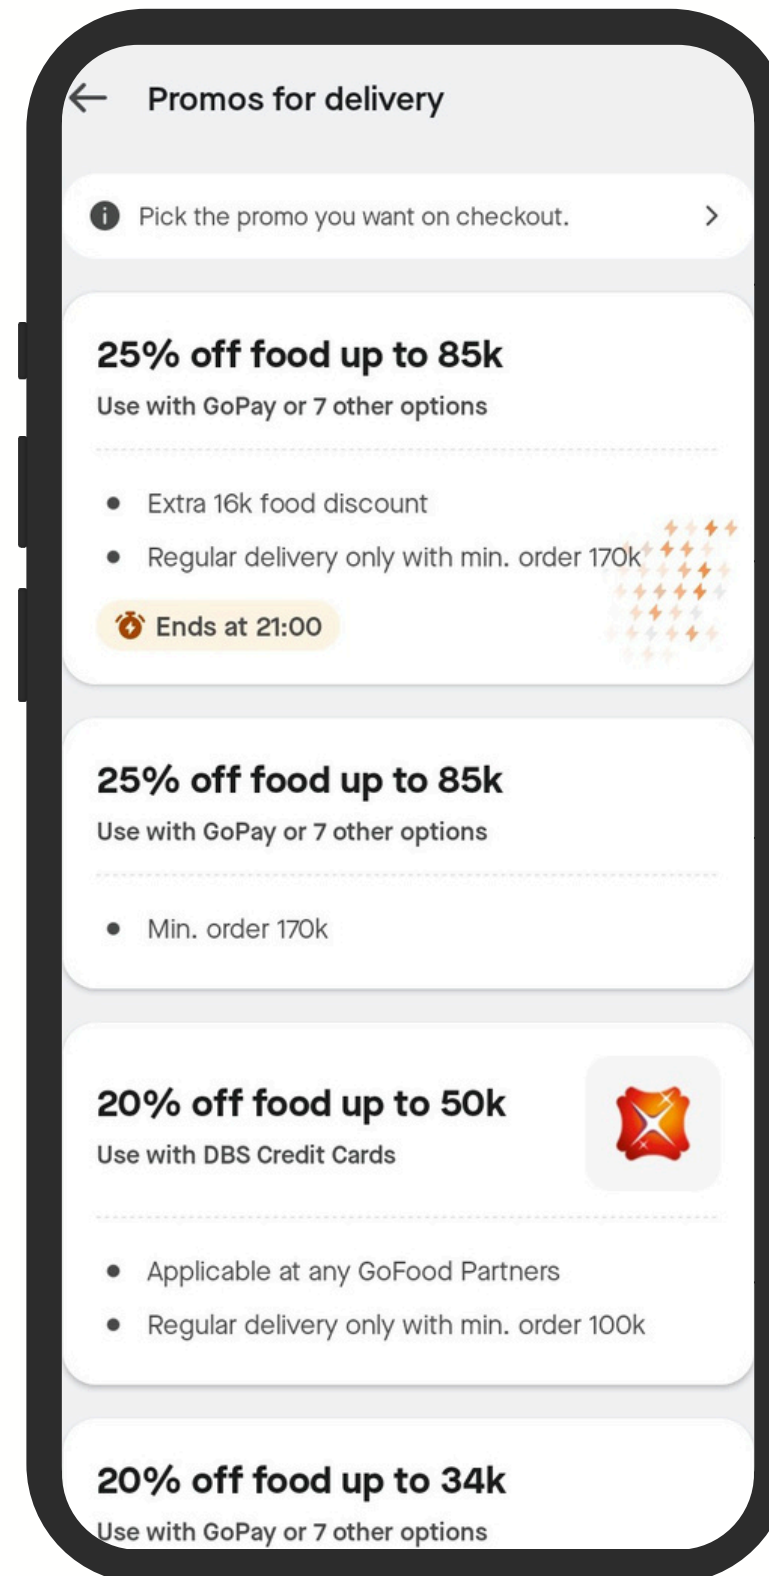

# Apply Coupon

## Metrics

- Promo Usage Rate
- Average Discount Received

## Example Values

- 30%
- \$5

## ● Trigger When

User applies a promo code

## ● Event Name

Apply Promo / Coupon

## ● Data To Be Tracked

User ID  
Timestamp  
Promo Code

## ● Notes & Details

This is how we will understand the effectiveness of promotional campaigns and user sensitivity to discounts.

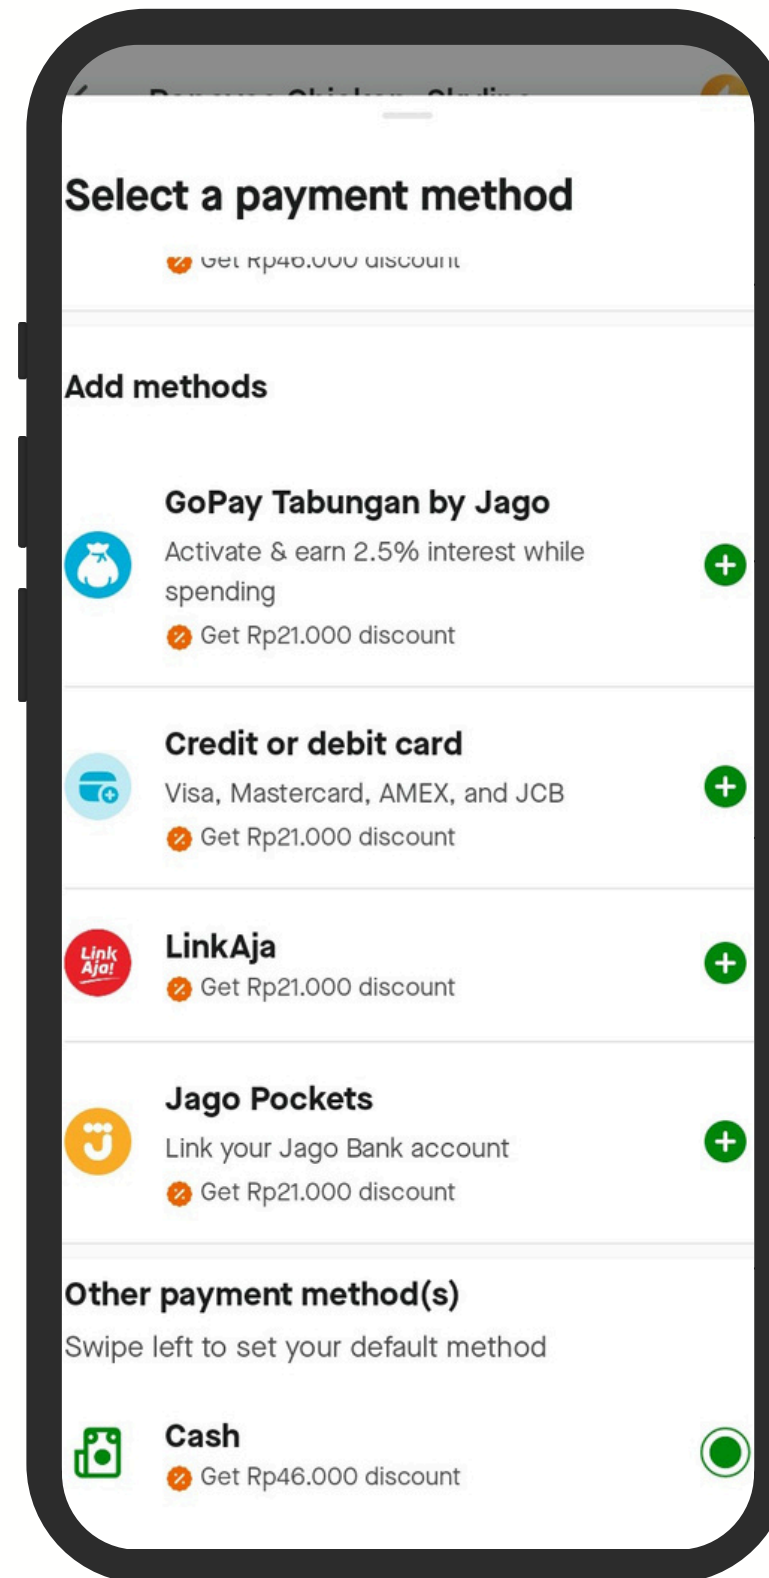

# Payment Method

## Metrics

- Gopay Coins Amount
- Default Payment Method
- Activated Payment Method
- Inactive Payment Method
- Card Name ID
- Card Number

## Example Values

- 5000
- Cash
- GoPay, Cash, Card
- LinkAja
- Name of User
- XXXXX

## ● Trigger When

User select payment method

## ● Event Name

Select Payment Method

## ● Data To Be Tracked

User ID

TimeStamp

Payment Method

## ● Notes & Details

This is how we will know which payment method is most popular and identify any inactive ones, gaining valuable insights into user preferences and potential issues.

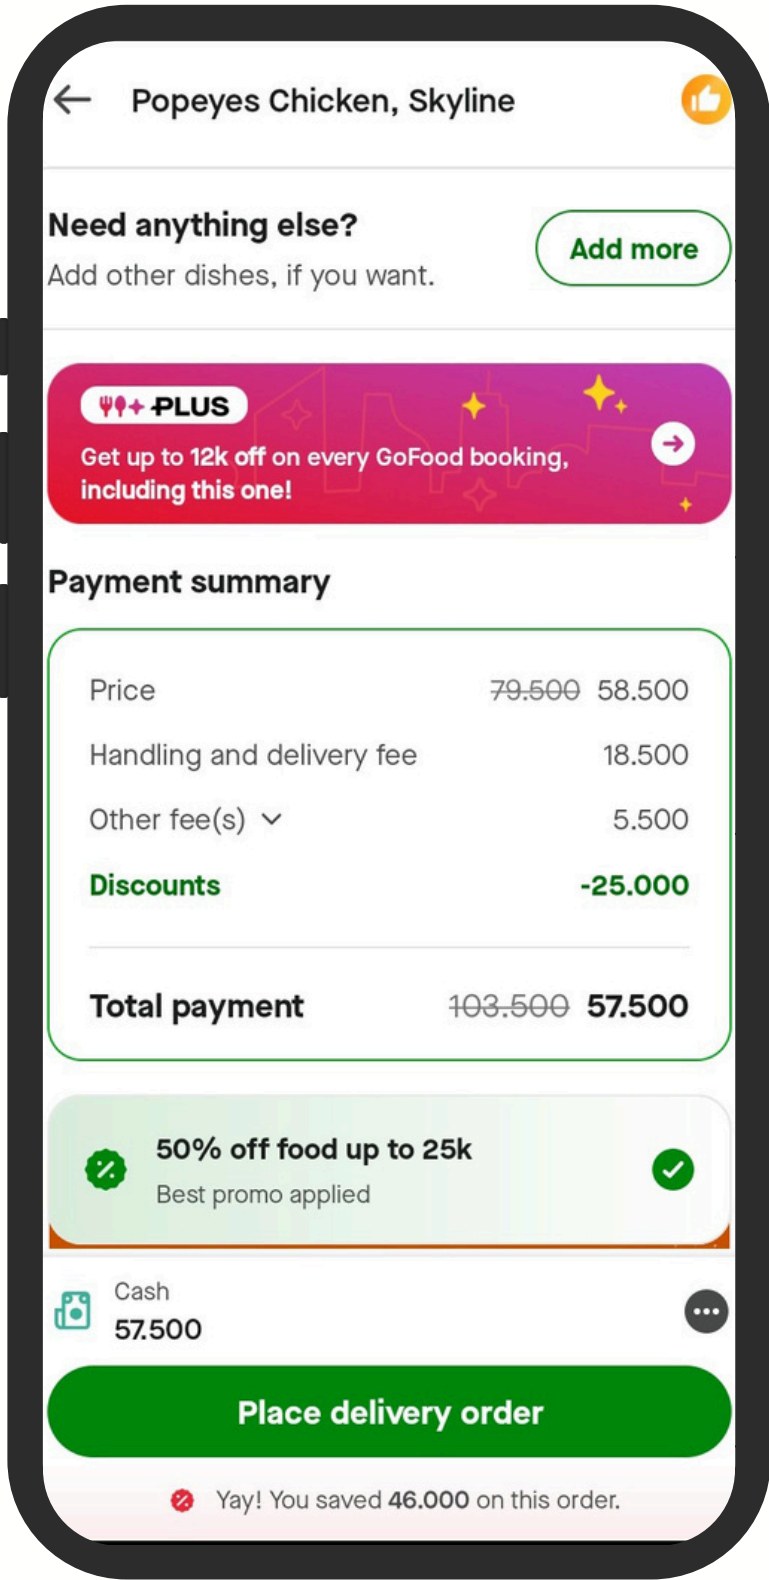

# Place Order

## Metrics

- Order Completion Rate
- Average Order Value
- Items per Order
- Order Placement Time
- Order Abandonment Rate

## Example Values

- MYL01
- 3 items
- 60%
- 30%

## Trigger When

User confirms and places the order

## Event Name

Order Placed

## Data To Be Tracked

User ID

Timestamp

Order Summary

Payment Summary

Delivery Location

## Notes & Details

This is how we will know the order completion rate, size and placement time to understand user behavior.

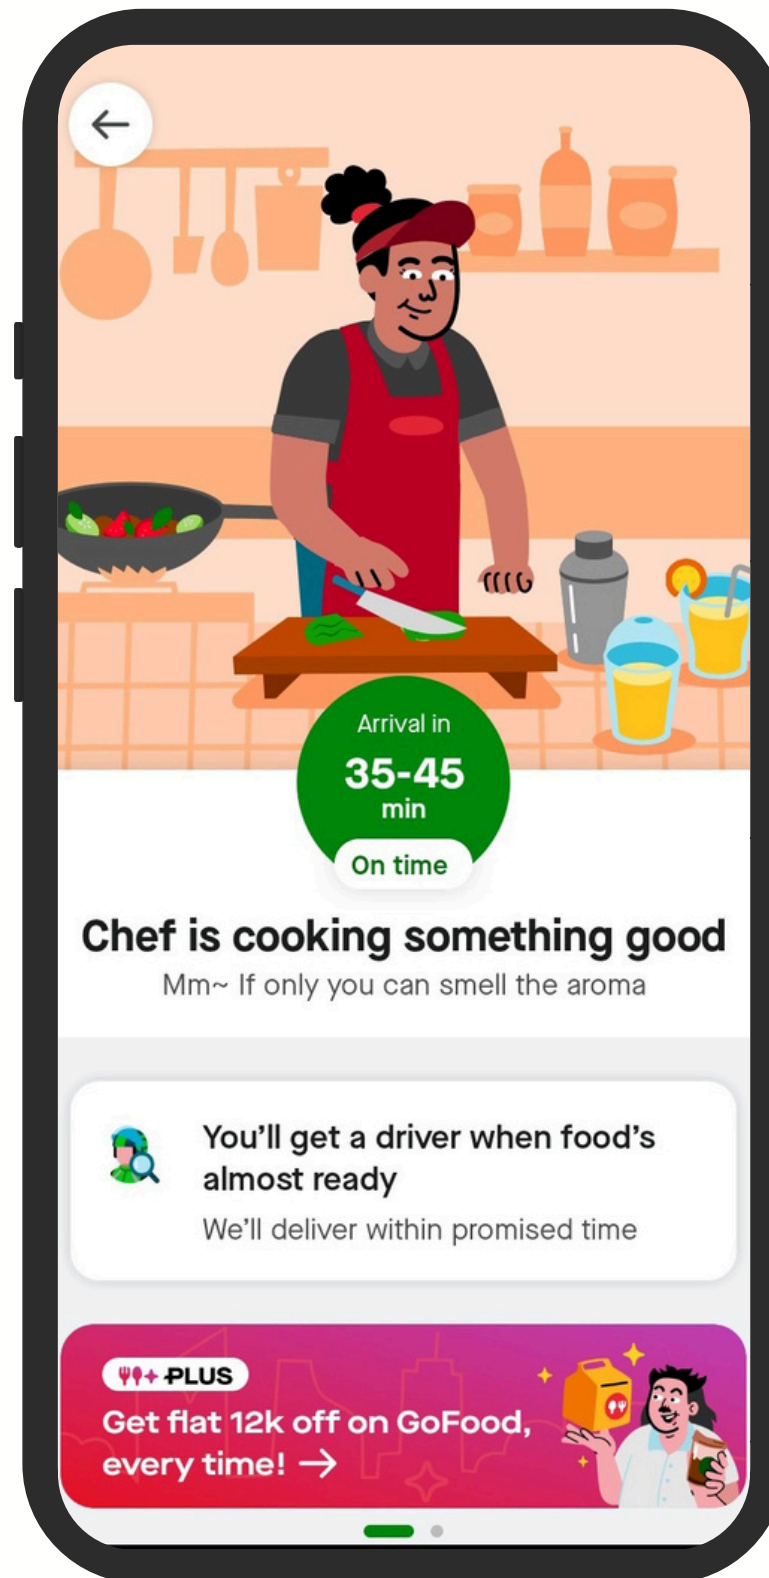

# Order Status

## Metrics

- Average Order Processing Time
- Order Status Update Frequency

## Example Values

- Accepted
- 30 minutes

## ● Trigger When

Restaurant updates order status

## ● Event Name

Order Status Updated

## ● Data To Be Tracked

User ID

Order ID

Timestamp

Order Status

Delivery Time

## ● Notes & Details

This is how we will know the efficiency of order processing and delivery times, providing insights into operational performance and potential delays.

**Next**

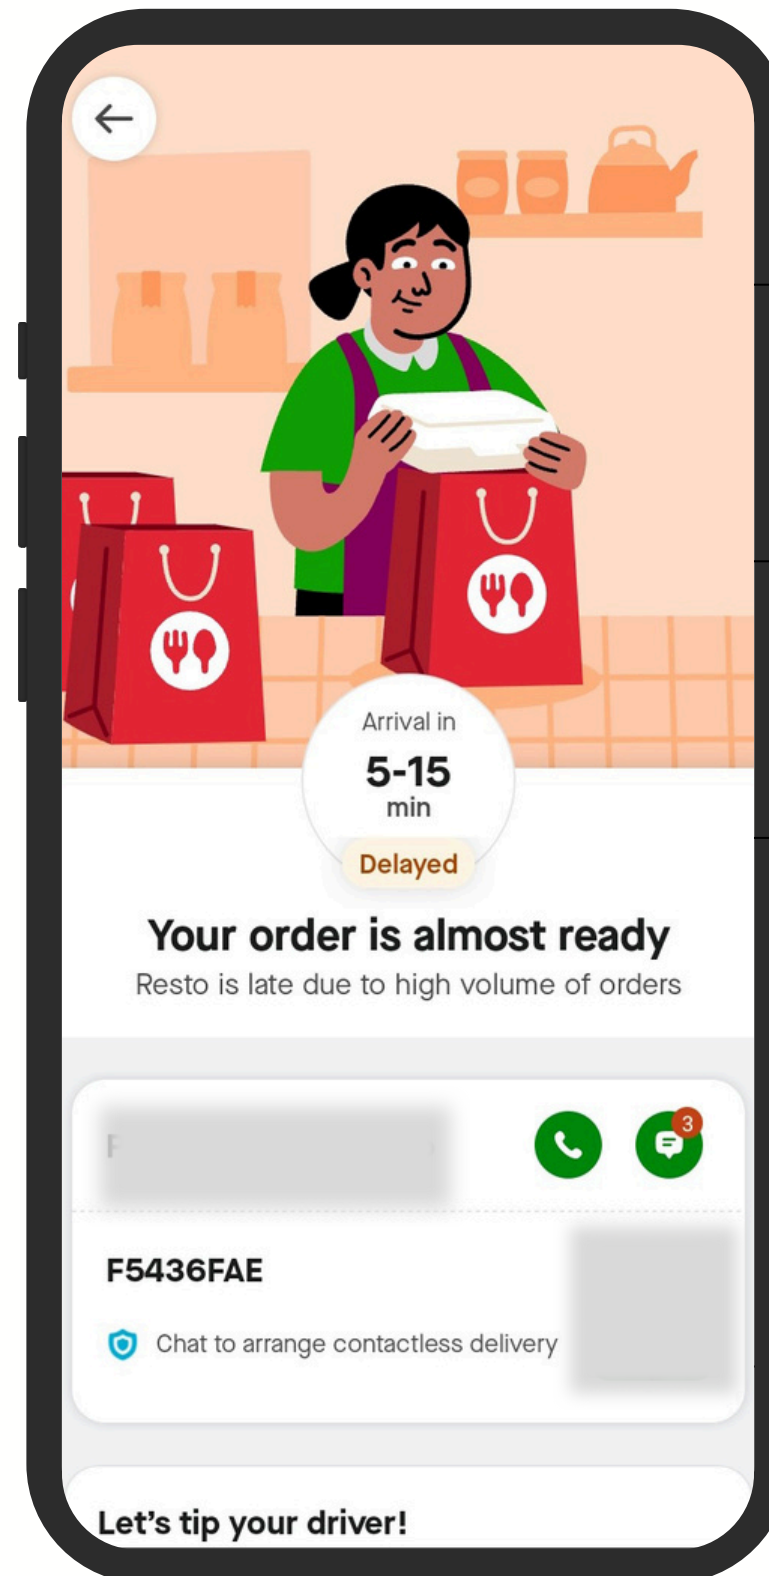

# Driver Assigned

## Metrics

- Average Time to Assign Driver
- Driver Assignment Success Rate

## Example Values

- 5 minutes
- 80%
- F5436FAE

## ● Trigger When

Restaurant assigns a driver

## ● Event Name

Driver Assigned

## ● Data To Be Tracked

User ID

Order ID

Timestamp

Driver ID

## ● Notes & Details

This is how we will know the efficiency and success rate of driver assignments, impacting overall delivery times.

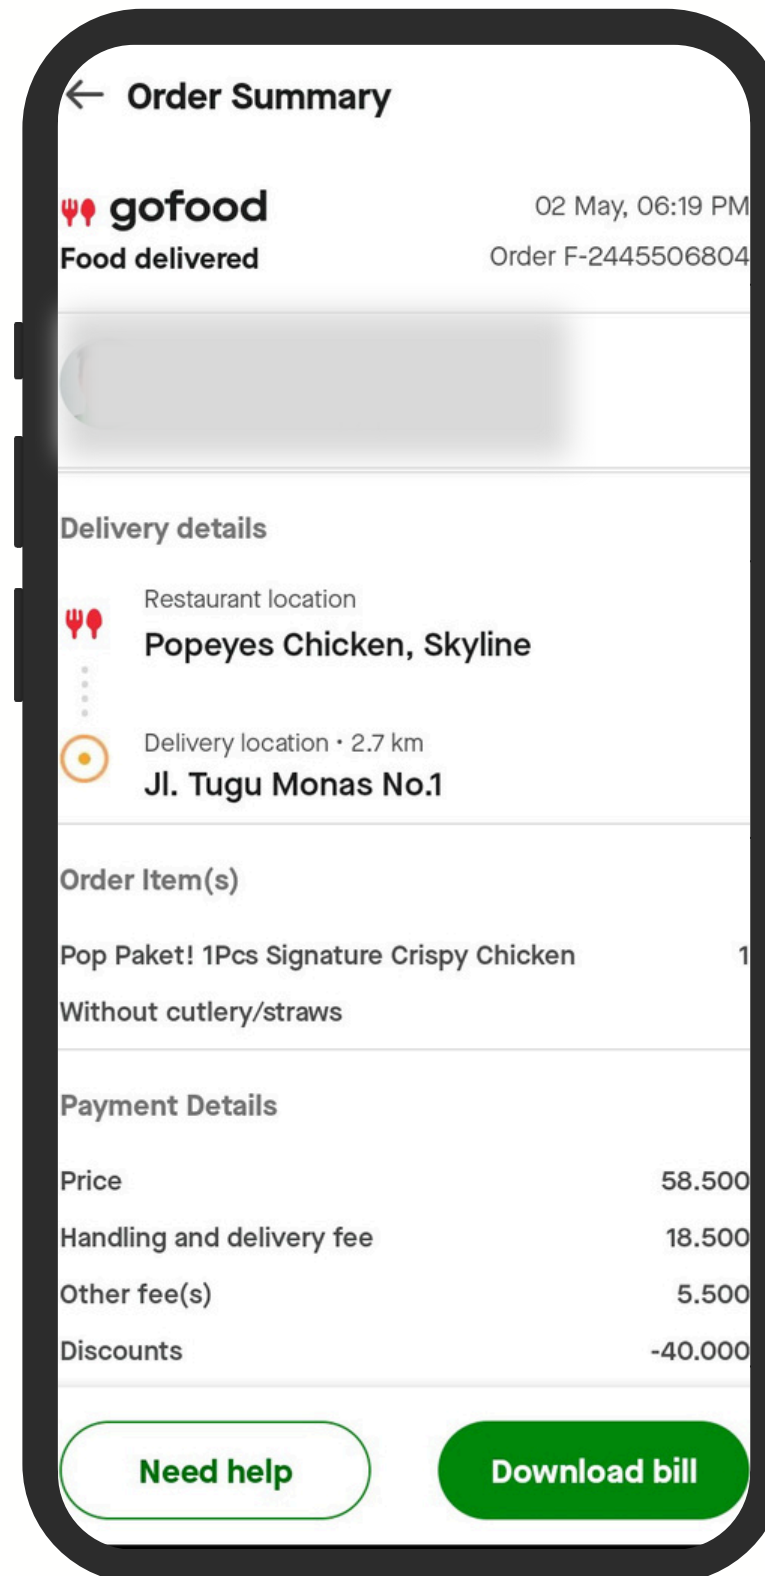

# Order Delivered

## Metrics

- Delivery Success Rate
- Average Delivery Time
- Delivery Time Variance

## Example Values

- 70%
- 30 minutes
- 2.83 minutes

## ● Trigger When

User confirms receipt of the order

## ● Event Name

Order Delivered

## ● Data To Be Tracked

User ID  
Order ID  
Timestamp  
Delivery Time

## ● Notes & Details

This is how we will know the delivery performance and customer satisfaction regarding delivery times.

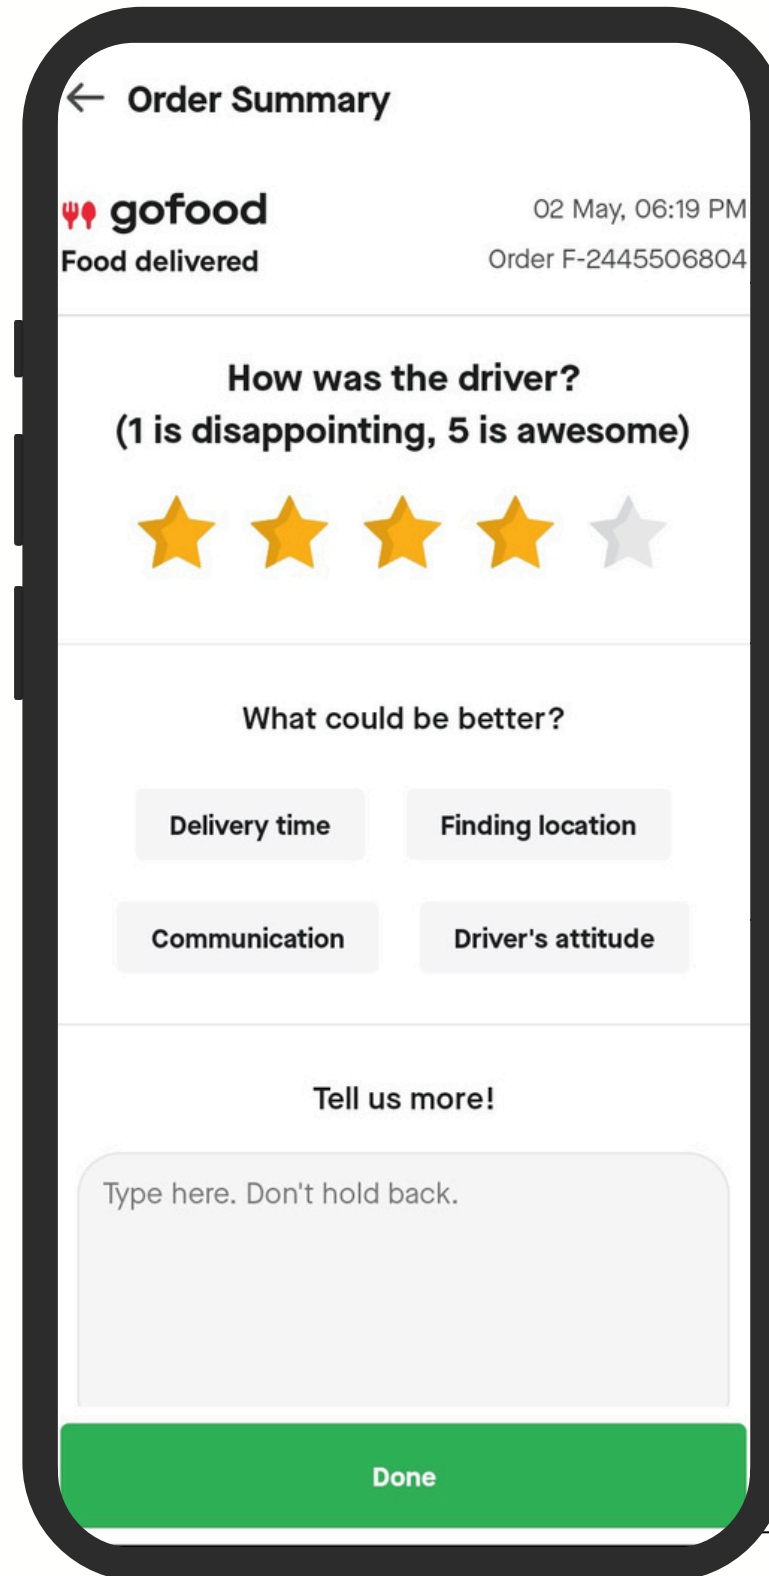

# Driver/App Rating

## Metrics

- Average Driver Rating
- Average App Rating
- Feedback Sentiment Score ( NLP )

## Example Values

- 4
- 3
- Great Service!

← Order Summary

gofood 02 May, 06:19 PM  
Food delivered Order F-2445506804

How was the driver?  
(1 is disappointing, 5 is awesome)

★★★★★

What could be better?
